Art Unit: 2124

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6 and 9-15 are, drawn to method / program for generating a corresponding Hebrew character representative for a positive integer number, classified in class 708, subclass 204.

II. Claims 7-8 are, drawn to a Hebrew number generating system used in digital communications, classified in class 704, subclass 2.

2. The inventions are distinct, each from the other because:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
